

## Tips and Tricks

- Write down important concepts in a cheat sheet from formulas section and use these to solve problems from sheets and ncert. A fair number of questions are given below each video on the website try to solve them.
- Try to be an active reader and problem solver to grasp any concept of any subject. By active I mean consistency. Consistency is everything.
- I have given similar types of problems in problem sections, try to solve them in timed manner. Timing your problem solving can make your study more efficient.
- In Mathematical Reasoning knowing your definitions and truth table is all there is to it. So make sure that you know and understand all of it, since in JEE mains there are easy questions from this chapter every year. Learn well to get these easy marks.
- Best way to prepare it: Understand the theory and examples first. Then solve questions from problem sections and reference books like NCERT.
